# INDEX TO VOLUME 48

The asterisk (*) preceding the page number indicates an original article. Subject entries are made for all articles. Author entries are made for original articles, and society transactions. Biographies, Book Reviews, Pediatrics in Art and Society Transactions are indexed under the letters B, P and S, respectively.

**Abdomen**, abdominal catastrophes of new-born, 644
acute; pericarditis simulating acute condition of abdomen, 1121
agenesis abdominalis, 467
glandular tuberculosis; study with reference to fecal fat content, 189
Abnormalities and Deformities: See also Monsters; Twins; and under names of diseases, organs and regions
agenesis abdominalis, 467
hereditary familial craniostosis: craniofacial dysostosis, 178
malformations of lower part of body, 1379
multiple bony malformations, 1102
Abscess: See also under names of organs and regions
otogenous parapharyngeal abscesses, pathogenesis of, 445
peritonsillar; tonsillitis with nephritis and peritonsillar abscess despite tonsillectomy, 446
subdiaphragmatic; retrocecal gangrenous appendicitis complicated by subdiaphragmatic abscess, empyema, abscess in lung with bronchial fistula and fecal fistula, with operations and recovery, *580
Abt, A. F.: Comparative study of blood iron and hemoglobin in premature infants, 929
Abt, I. A.: Treatment of whooping cough, study in history of therapeutics, *617
Acetarsone, clinical arsenical myelitis and neuritis due to acetarsone, report of 2 cases with 1 death; negative observations at necropsy, *134
in congenital syphilis; comparison with bismuth therapy, *272
in osseous lesions of early congenital syphilis, *548
in syphilis in Negro children, *81
Acetylcholine in acrodynia, 914
Achondroplasia, 178
chondrodystrophia foetalis diagnosed by roentgen examination before delivery, 642
congenital micromelia, 2 cases, 415
fetalis, 175
Acid, ascorbic, antiscorbutic action of, 640
lactic, and citric acid whole milk in infant feeding, 1377
nucleic, experiments on growth and longevity of white mouse, influence of continuous administration of vegetable nucleic acid and intermittent administration of thyroid on growth and longevity, 1371
oleic, experiments on growth and longevity of white mouse; influence of injections of thorium oleate in oleic acid, and of oleic acid alone, on growth and longevity, 1371
Acid-Base Equilibrium; alimentary intoxication in infants; acid-base equilibrium with use of continuous intravenous therapy, 405
Acidosis, diabetic methods for relief, 940
Acrodynia, 207, 1421, 1456
etiology and treatment of pink disease, 207
in girl 3½ years old, early appearance and long duration of ocular symptoms, 208
infantile, 208, 209
report of case with pathologic study, *1326
treatment with acetylcholine, 2 cases, 914
vitamin deficiency disease, 913
Actinomycosis, isolated, of kidney, 194
Adams-Stokes Disease: See Heart block
Addis sediment count in normal children; Addis sediment count in scarlet fever, 420
Addison's Disease, roentgenologic picture, 1132
salt and water metabolism in, 936
Adenitis: See under Lymph Nodes
Adenoids, adenotonsillectomy and disease of upper respiratory tract (common cold) in adults, 204
end-results of tonsil and adenoid operation in childhood and adolescence, 205
roentgen picture of epipharynx under normal conditions and when adenoid vegetations exist, 446
Adrenalin: See Suprarenal Preparations
Adrenals: See Suprarenals
Agave, study of effects of agave concentrate in treatment of experimental nephritis induced in animals, nephritis induced in rabbits by use of tartrates; nephritis induced in dogs by use of uranium nitrate, 3171
Agranulocytosis: See Angina, agranulocytic
Albers-Schönberg's Disease: See Osteosclerosis
Albuminuria, orthostatic, 896
orthostatic, with status thymicolymphaticus, 1125
Aldrich, C. A.: Bacillus pertussis hemophilus endo-antigen (Krueger), 1161
Report of cases, 1459
Alexander, H. E.: Origin of Lactobacillus bifidus and its possible relation to celiac disease, 1431
Allen, P. D.: Nephrosis complicated by pneumococcic peritonitis, 1168
Allergy: See Anaphylaxis and Allergy
Amaurosis: See Blindness
Amberg, S.: Osteomyelitis, 690
American Board of Pediatrics, certification by, 166, 399, 1370
Amidopyrine-fast fevers, clinical significance in diseases of infants and small children; grip and pneumonia, 1406
Amino-Acids, further investigations on breakdown of amino-acids in animal body, 876
Ammonium chloride decalcification as modified by calcium intake: relation between generalized osteoporosis and osteitis fibrosa, 192
Amniotic Fluid; congenital tuberculosis of lung due to aspiration of, 191
diseases of lungs in new-born associated with aspiration of, 647
erepsin in liquor amnii and fetal intestines in every stage of pregnancy and in meconium of human new-born, 419
Amyloidosis in 8 year old child, 1440
Amyotonia: See Myotonia
Anaphylaxis and Allergy; allergic epilepsy, 660
allergy as related to otolaryngology and pediatrics, 443
mechanism of urticarial idiosyncrasy to egg white in eczematous child, 1422
observations on formation of wheals, response of normal and allergic individuals, 891
so-called allergic manifestations and incidence of respiratory infections in rheumatic and in non-rheumatic children, 890
urinary proteose, allergic dermatoses and eczema-asthma-hay fever complex, 1120
value of differential blood cell counts on nasal and sputum films in diagnosis of conditions of upper respiratory and bronchial tracts, 224
Anarthria: See Aphasia, motor
Anderson, B. G.: Study of teeth of group of school children previously examined for rickets, *713
Anderson, W. S.: Rat-bite fever, 1441
Anemia, anemic diathesis, 195
climatic, dietetic and medicinal treatment, 431
cure of nutritional anemia by one of legumes, 1398
diagnosis and treatment of secondary anemia, 1401

Anemia—Continued
erythroblastic anemia, case report, 1401
hemolytic, in new-born, 3 types of, 646
hemolytic, influence of plasma and plasma extracts on course, 932
in new-born child, severe, 646
lymphadenosis commencing with clinical picture of hypoplastic anemia, 1403
of infancy from maternal iron deficiency in pregnancy, 1123
of new-born without erythroblastosis, observations at autopsy, *335
of prematurity, *1237
pernicious, indications for splenectomy, 918
primary anemic states in early infancy, 1137
rôle of erythrocyte fragmentation in genesis of anemia, 1124
size and hemoglobin content of red blood cells in normal and anemic states, 929
Anencephaly: See Monsters
Anesthesia, rectal, with methyl-propyl-carbinol-urethane in conservative dentistry, 213
spinal, in infant, 916
Aneurysm, anomalous origin of left coronary artery from pulmonary artery with myocardial fibrosis of left ventricle and partial aneurysm at apex, *113
thoracic aortic aneurysms, their relation to rheumatic fever, *780
Angina, agranulocytic, disease picture of, 430
agranulocytic, roentgen treatment with report of 2 recoveries, 1120
agranulocytic, treatment with adenine sulphate, 1400
treatment of acute nondiphtheritic anginas with diphtheria antitoxin, 444
Vincent's, postanginal sepsis, 464
Angiokeratoma of Mibelli, etiology of, 209
Angioma, massive, in early infancy, roentgen therapy of, 207
Anomalies: See Abnormalities and Deformities; and under names of organs and regions
Anorexia: See Appetite
Anspach, W. E.: Atelectasis and bronchiectasis, 701
Xanthomatosis with involvement of vertebral body, *346
Antell, L.: Typhoid paratyphoid therapy in idiopathic epilepsy, clinical and experimental study, *1201
Anthropometry; anthropometric studies of Jewish-Italian child, 920
mutual relation between height and weight of Japanese new-born, 420
Antigens and Antibodies; milk antibodies in serum of infants, 410
origin of normal antibodies, 168
Antrum, transosseous vascular anastomosis between maxillary sinus and orbit in human fetus and in new-born, 880
Aorta, anomaly of heart with transposition of aorta, 876
cardiac hypertrophy in infancy associated with thickened endocardium and coarctation of aorta, *1072
congenital stenosis (coarctation), atresia and interruption of aortic arch, 178
Aphasia, auditory; congenital deficiency of conscious auditory perception of words (word-deafness), 436
motor; case of anarthria (motor aphasia) with recovery, 664
speech defect, general classification; associative aphasia, 912
Appendectomies, 1200
appendectomies in eastern Europe, 1148
Appendicitis, 675
and Meckel's diverticulum, 916
history; pediatric biographies: Jean Fernel, 1497?-1558, note on history of appendicitis in children, *630
in children aged 1 and 1½ years, 919
in children of from 1 to 12 years of age; diagnosis, incidence and prognosis with survey of 288 consecutive cases from Saginaw General Hospital, 221
oxyurids in appendix and appendicitis, 1147
Appendicitis—Continued
retrocecal gangrenous appendicitis complicated by subdiaphragmatic abscess, empyema, abscess in lung with bronchial fistula and fecal fistula, with operations and recovery, *580
Appendix, appendical oxyuriasis and appendicitis, 1147
in prodromal stage of measles, 187
Appetite, why child refuses to eat, 1413
Apple, comparison of raw apple with apple powder in diarrhea, 875
diet, action of, 875
diet, effect on nitrogen and mineral metabolism, 640
diet in chronic fermentative dyspeptic enteritis, 1376
diet in infants and small children, 1376
diet in intestinal disorders, 1376
powder in diarrhea, 875
Archnodactylia: See under Fingers
Argyll Robertson Pupil: See Pupil
Argyria: See under Silver
Aries, P. L.: Tuberculous meningitis: statistics of Cook county hospital for 1933, 464
Arnim, S. S.: Study of teeth of group of school children previously examined for rickets, *713
Arsenic, clinical arsenical myelitis and neuritis due to acetarsone, report of 2 cases with 1 death; negative observations at necropsy, *134
Arsphenamine, chorea caused by toxic effect of neoarsphenamine, 442
purpura haemorrhagica in congenital syphilis following arsphenamine, 887
Art, Pediatrics in Art: Animals as wetnurses, *1369
Care of new-born, *633
Delousing head, *397
Devices for walking, *1094
Heliotherapy, *864
Miraculous Resurrections, *165
Artery, cerebral, case of bilateral occlusion of posterior cerebral artery, 439
coronary; anomalous origin of left coronary artery from pulmonary artery with myocardial fibrosis of left ventricle and partial aneurysm at apex, *113
Retinal: See Retina
Arthritis: See also Rheumatism
acute, gonorrheal, in new-born, 180
acute meningitis and arthritis due to Pfeiffer bacillus in infant, 200
chronic, blood cultures in, 891
chronic polyarthritis, 2 cases, 429
clinical discussion of Still's disease and chronic arthritis, 1407
deformans, histologic picture of rheumatic fever; frequency of coincidence of arthritis deformans and chronic endocarditis (relation between chronic inflammation and deforming arthritis), 1133
hemophilic, 1126
multiple, with contractures, 1457
transitory, of hip-joint, 1128
Arthrodysplasia, hereditary, associated with hereditary dystrophy of nails, 413
Ascaris, intestinal occlusion by, 429
santonin in treatment of infantile ascariasis, 658, 1129
Asphyxia, acute, from intrabronchial rupture of tuberculous mediastinal gland with recovery, *373
gas therapy in obstetrics and pediatrics, 469
neonatorum, new method for prevention in prolonged or difficult labor, 415
neonatorum, prevention and treatment, 645, 1379
neonatorum; resuscitation of newly born babies showing narcosis, 644
Astasia-abasia fear in child of 5 years, 200
Asthma: asthmatic attacks alternating with eczema, 208
intratracheal injections of iodized oil, value of, 890
suprarenal cortex extract in, 891
urinary proteose: allergic dermatoses and eczema-asthma-hay fever complex, 1120
Atelectasis: See Lung, collapse

Athletics, effect of camping on youth, 1425
sports training of youths, 920
Athrepsia: See under Nutrition
Atrophy, Muscular: See also Dystrophy, muscular
muscular; origin of creatine and treatment of progressive muscular atrophies with glycine, 202
Atropine, 681
vitiligo from repeated instillation of, 208
Autopsies, study of 500 consecutive autopsies, 214
Autovaccines: See Vaccines
Avertin: See *tri*Brom-Ethanol
Avitaminosis: See Deficiency Diseases; Vitamins; and under names of deficiency diseases

**B C G**: See under Tuberculosis
Bacal, H. L.: Vascular occlusion in pneumonia, review of literature and report of case, *830
Bacillus: See Bacteria
Bacteria: See also Diphtheria, bacilli; Tubercle Bacilli; etc.
Bordet-Gengou Bacillus: See Whooping Cough
Brucella abortus infection in early infancy, 1106
Brucella infections with reference to undulant fever in Scotland, 651
coli; gaseous pyocolpos due to colon bacillus in new-born infant, 879
Pfeiffer, acute meningitis and arthritis due to, in infant aged 3 months, 200
Pfeiffer, prolonged form of meningitis due to, 200
Bacteriotropine: See Opsonins
Bailey, P.: Intracranial tumors, 1163
Bakwin, H.: Body build in infants, influence of retarded growth, *1030
External dimensions of new-born, *1234
Bakwin, R. M.: Body build in infants, influence of retarded growth, *1030
External dimensions of new-born, *1234
Bang's Disease: See Undulant Fever
Barbiturates, comparative study of antidotal action of picrotoxin, strychnine and cocaine in acute intoxication by barbiturates, 868
Barker, P. W.: Some phases of tuberculosis, 4159
Barlow's Disease: See Scurvy
Barnes, D. J.: Rickets; control with 50 units (Steenbock) of cod liver oil vitamin D concentrate in milk, *1258
Bass, M. H.: Pneumococcic peritonitis from pediatric point of view, 1169
Behavior, biological and social background of tantrum case, 660
cartoonist and child behavior, 701
contribution of physical illness to development of behavior disorders, 1141
friendships and quarrels among preschool children, 1139
organic disease as cause of behavior difficulties in small child, 666
problems, some categories of, 232
psychopathic constitution and organic nerve disease as cause of behavior problems, 667
Beriberi, changes in inorganic and organic phosphorus in experimental beriberi, 637
Bernhard, A.: Blood proteins; distribution in same specimen of blood of hydrolyzable, amide, humin, basic amino and mono-amino nitrogen of whole blood, red cells and serum proteins, *819
Bile-ducts, atresia, congenital, 177

BIOGRAPHIES:
Andreas Ritter von Hüttenbrenner, note on history of pyelitis, *1367
Bessejon de La Chassagne; note on history of diabetes insipidus, *1092
Fernel, Jean, note on history of appendicitis in children, *630
Gee, Samuel, note on history of celiac disease, *159
Lange, Johannes, note on history of chlorosis, *393
Whistler, Daniel, note on history of rickets, *858

Birth, Injuries: See under New-Born Infants
Biskind, G. R.: Acrodynia, report of case with pathologic study, *1326
Bismuth, acetarsone in treatment of congenital syphilis; comparison with bismuth therapy, *272
Black, R.: Management of rheumatic child, 1152
Bladder, calculi, clinicoroentgenologic study, 1423
calculus in child aged 10 years; urinary lithiasis in childhood, 918
calculus; vesical lithiasis in child aged 6 years, 918
diverticulum of bladder, *842
Blayney, J. R.: Osteomyelitis of maxilla in nurslings and in infants, *730
Blenorrhea: See Gonorrhea
Blindness, acquired amaurosis in child, 670
partial cortical blindness with preservation of color vision; report of case following carbon monoxide poisoning; consideration of question of color vision and its cortical localization, 203
Blood: See also Erythrocytes; Leukocytes
acid-base equilibrium of blood in epilepsy, 661
behavior of urea, uric acid and cholesterol of blood in course of meningo-encephalopathies, 1417
calcium; variations of calcium content in blood serum as influenced by viosterol and ultraviolet irradiation, 873
catalase, clinical investigations on normal children, 635
chlorides, relation to toxicosis in infant, 638
cholesteremia in normal babies and babies affected by various diseases, 636
cholesteremia in pellagra, 170
cholesterol and creatinine; basal metabolism in children of normal and subnormal intelligence and its relation to blood cholesterol and creatinine, 227
cholesterol, in pellagra, 170
circulation time and rate of blood flow in children from 6 to 15 years of age, 402
coagulation; new investigation on second phase, 168
concentration of guanidine-base in blood and spinal fluid under diverse pathologic conditions, 429
copper content of, 634
count, value of differential blood cell counts on nasal and sputum films in diagnosis of conditions of upper respiratory and bronchial tracts, 224
diseases; late results of splenectomies for disturbances in blood, 917
dyscrasia resembling Still-Chauffard's disease, 432
effect of changes in extracellular electrolyte on cellular electrolyte and water, 938
endocarditis with leukemic reaction, 429
fat content in small quantity of blood, determination of, 1372
fetal blood studies; oxygen and carbon-dioxide dissociation curves of fetal blood, 412
forming organs, reactions and diseases of, 195
hydrogen-ion concentration; *p*H and alkaline reserve in chronic nutritional disturbances and toxicosis, 638
iron and hemoglobin in premature infants, comparative study, 929
lead; correlation of clinical picture of lead poisoning with lead content of blood in urine, 680
lead in, spectrographic determination, 1437
lipids of blood plasma in epilepsy, statistical study of single determinations in 100 epileptic and 32 "normal" subjects, 900
lipids of blood plasma in epilepsy, variations of lipids in relation to occurrence of seizures, 900
phosphatase in plasma in rickets and other disorders of growth, 871
phosphatase; serum phosphatase as criterion of severity and rate of healing of rickets, *1268

Blood—Continued
phosphate; influence of ultraviolet rays on amount of phosphate in blood of fasting animal, 1100
phosphatides, quantitative determination, 1372
phosphorus; changes in inorganic and organic phosphorus in experimental beriberi, 637
phosphorus curve in normal animals and in animals which had received ultraviolet rays, 174
phosphorus, disturbances in rickets; rickets and tetany in fistulas of gallbladder, 173
phosphorus; inorganic and acid-soluble organic phosphorus of blood serum in spontaneous and in experimental rickets, 1100
phosphorus; total phosphorus of blood and muscle and its elimination by kidney in course of acute and chronic scurvy, 167
plasma, influence of plasma and plasma extracts on course of hemolytic anemia, 932
pressure in school children, 431
proteins; distribution in same specimen of blood of hydrolyzable, amide, humin, basic amino and mono-amino nitrogen of whole blood, red cells and serum proteins, *819
sedimentation, low red cell sedimentation in cases of pulmonary tuberculosis, 889
sedimentation; rate of red cell sedimentation in cases of tuberculosis, 889, 1116
sedimentation; rate of sedimentation of erythrocytes in rheumatic infection, 703
sedimentation; repeated sedimentation tests, *814
sedimentation, simple method of determining, 168
serum albumin and globulin of new-born, premature and normal infants, 1373
sodium in plasma and in serum, Salit's modified technic of microdetermination, 869
sugar; chronic hypoglycemia, 936
sugar; distribution in blood and permeability of blood corpuscles to sugar, 172
sugar; hypoglycemia, critical review, 1403
sugar, hypoglycemia; metabolism and differential diagnosis of glycogen disease, 1132
sugar in breast-fed infant, 171
transfusion in bronchopneumonia, 658
vapor pressure of blood by Hill's thermoelectric method, 1439
Blumberg, H.: Spectrographic determination of lead in blood, 1437
Bodansky, A.: Phosphatase studies; serum phosphatase as criterion of severity and rate of healing of rickets, *1268
Body build in infants; influence of retarded growth, *1030
form of young persons, 451
surface, method of determining body surface and its importance in calculating food requirements of infant, 637
Bohrer, J. V.: Two cases of pneumococcic peritonitis, 1166
Bonar, B. E.: Pelvirectal achalasia (Hirschsprung's disease); temporary medical management by rectal administration of magnesium sulphate, *123
Bones: See also under names of bones
anomalies; multiple bony malformations, 1102
atrophy; Morquio's disease, presentation of 2 cases, 1124
changes in rickets, 410
composition, effect of acid feeding on, 167
development as index of metabolic speed, 1097
Diseases: See Osteomyelitis; Osteosclerosis; etc.
fragility; ammonium chloride decalcification as modified by calcium intake: relation between generalized osteoporosis and osteitis fibrosa, 192
fragility; osteogenesis imperfecta and blue sclerae, 433
fragility; osteogenesis imperfecta congenita, 460, 898
fragility; osteogenesis imperfecta tarda, 196
leukemia with extensive osseous changes simulating rheumatic fever, 1453
Marble: See Osteosclerosis
Bones—Continued
phosphorus as cause of shadows in growing bones, 172
sporadic cretinism in 1 of twins, report of cases with roentgen demonstration of osseous changes that occurred in utero, *1316
syphilis, acetarsone in treatment of osseous lesions of early congenital syphilis, *548
syphilis, congenital, in early infancy, 1118
syphilis; roentgenographic studies of long bones in some cases of infantile congenital syphilis, 190
tuberculosis in unusual situation, 1115
tuberculosis of flat bones of vault of skull, 1115
tuberculosis, treatment with diet of Gerson, Sauerbruch and Hermannsdorfer, 428

Book Reviews:
Akuten Infektionskrankheiten des Kindesalters; E. Helmreich, 707
Anemias; J. M. Vaughan, 1463
Brucella Infections in Animals and Man; I. F. Huddleson, 1174
Children, Young People and Unemployment: Part III. Save the Children International Union, 1175
Chirurgie infantile d'urgence: M. Fèvre, 1463
Chronic Nephritis and Lead Poisoning; L. J. Jarvis Nye, 1175
Diet and Dental Health; M. T. Hanke, 1461
Geburstverletzungen des Kindes; M. H. Naujoks, 474
Hygiène et alimentation du nourrisson; G. Paisseau, 475
Lessons on Surgical Diseases of Childhood; W. Rankin, 1176
Let's Talk About Your Baby; H. K. Tenney Jr., 1463
Life of Sir Robert Jones; F. Watson, 707
Mental Hygiene in the Community; C. Bassett, 1461
Nature, M. D.; R. Kovács, 237
New Patterns in Sex Teaching; F. B. Strain, 474
Pediatric Nursing; G. Sellew, 943
Pleurésies à pneumocoques dans l'enfance; M. Péhu and A.-Z. Rougier, 707
Practical Pedodontia, or Juvenile Operative Dentistry and Public Health Dentistry; F. E. Hogeboom, 1174
Radiodiagnostico en la infancia; Manuel y Francisco Arce, 1177
Sex in Childhood; E. R. Groves and G. H. Groves, 475
Traité de médecine des enfants: Volume III; P. Nobécourt and L. Babonneix, 1176
Traité de médecine des enfants: Volume IV; P. Nobécourt and L. Babonneix, 1176
Traité de médecine des enfants: Volume V; P. Nobécourt and L. Babonneix, 474
Tuberculose pulmonaire et les maladies de l'appareil respiratoire de l'enfant et de l'adolescent; P. F. Armand-DeLille; C. Lestocquoy, and R. Huguenin, 1462
Wiener Diphtherie-Endemic der letzten Jahre; H. Zischinsky, 475

Borovsky, M. P.: Morbidity in new-born infants delivered by cesarean section, 465
Boyden, E. A.: Anatomy and physiology of gallbladder in children, cholecystographic study, *565; correction, 1095
Bradley, C.: Osteopetrosis (marble bones) in infant, review of literature and report of case, *949
Brain: See also Cerebellum; Meninges; Nervous System; etc.
acute purulent frontal sinusitis with oculo-orbital complication, cerebellar and labyrinthine phenomena; opening of both frontal sinuses and exploration of right frontal lobe of brain; fixation abscess; cure, 444
anomaly; fever of 6½ years' duration in child with congenital malformations of brain and spinal cord and congenital tumor of medulla, 667
atrophy; Pick's disease in 21 year old boy, 1446
blood urea, uric acid and cholesterol in meningoencephalopathies, 1417
cerebromacular degeneration, 903

Brain—Continued
congenital hypertrophy of muscles, extrapyramidal motor disturbances and mental deficiency, clinical entity, *243
deviations in new-born, 420
disease in diphtheria, 185
Encephalography: See Brain, roentgenography
hemorrhage, future of children with intracranial hemorrhage at birth, 905
injuries; glycogen content of liver in meningitis and injuries of brain, 202
injuries, treatment of, 448
injury at birth to one of identical twins, *130
injury in new-born, its relation to constitution and tetany syndrome, *517
lipoid content of tissues in status epilepticus, toxic encephalopathy and chronic leptomeningitis, 689
mesencephalic syndrome, 663
phospholipoids of brain and diphtheritic toxin; pathogenesis of diphtheritic paralysis, 1109
roentgenography; disturbances in vision and in visual fields after ventriculography, 1410
roentgenography (encephalography), 1138
roentgenography; encephalography in children, further observations in children with fixed lesions, 1410
roentgenography; experiences with encephalography in diseases of nervous system, 663
roentgenography; significance of direct ventriculography for localization of brain tumors with special reference to tumors of posterior fossa, 1417
tuberculoma with report of 4 cases, 899
tumors in infancy, clinical and pathologic study, *739
tumors, roentgenologic diagnosis of tumors of third ventricle, 1418
Breast, bilateral amastia with associated deformity of extremities, 416
Feeding: See Infant Feeding; Milk, human
time at which casein begins to be formed in breast during pregnancy, 1372
Brem, J.: Amyloidosis in 8 year old child, 1440
Bright's Disease: See Nephritis
Brill's Disease: See Typhus
Brodie, M.: Cerebral involvement in acute anterior poliomyelitis; report of experimental case, *57
*tri*Brom-Ethanol; avertin in rheumatic encephalitis, 1452
avertin in tetanus, 1386
Bronchi, cardiac bronchostenosis and atelectasis, 1135
diameter and growth of bronchial tree, 401
intrabronchial administration of iodized poppy seed oil (40%), 444
structure of bronchial tree, 401
Bronchial Glands: See Lymph Nodes
Tree: See Bronchi
Bronchiectasis and atelectasis, 701
dry, 1127
Bronchitis, vegetal (peanut) bronchitis, 891
Bronchopneumonia, blood transfusion in, 658
mortality in, 1409
Bronchoscopy, tracheobronchial croup, probably streptococcic; cure by tracheotomy and bronchoscopy, 909
Brown, E. W.: Effect of acute diseases on reaction of skin to tuberculin, 685
Brown, S. S.: Anemia of new-born without erythroblastosis, observations at autopsy, *335
Brucella Abortus: See under Bacteria
Brucellin, possible specific in undulant fever in man, preliminary report, 648
de Bruin, M.: Cutaneous reactions of children to pneumococcus and streptococcus vaccines, *791
Bunting, R. W.: Control of dental caries, *6
Burgin, L. B.: Occurrence of Streptococcus haemolyticus in throats of children in hospital wards, 925
Bursa, cystic hygroma of neck, report of case and review of literature, *149
treatment of cystic hygroma of neck by sodium morrhuate, 916
Butler, C.: Case for presentation, 456

Calcemia: See Blood, calcium
Calciferol, antirachitic activity of, 1374
Calcium in Blood: See Blood, calcium
influence on growing rats, 404
metabolism, upsets of, in infancy and treatment, 1099
rôle of parathyroid in regulation of calcium and potassium ions; rôle of digestive glands and liver in regulation of calcium and potassium ions; rôle of suprarenal glands and complex of glands of internal secretion on regulation of calcium and potassium ions, 1100
study of calcium and phosphorus assimilation by dairy cows, 408
Calvin, J. K.: Mediastinal abscess, 456
Thoracic aortic aneurysms in children, their relation to rheumatic fever, *780
Camping, effect of camping on youth, 1425
Cancer: See Sarcoma; Tumors; and under names of organs and regions
Canities: See under Hair
Capillaries of infants and mentally deficient children, 667
significance of capillary microscopy in oligophrenia, 666
Capper, A.: Thymus gland and thymic symptoms, 229
Caput Obstipum: See Torticollis
succedaneum, hindrance to labor, 418
Carbohydrates, effect of various carbohydrates on nonprotein respiratory quotient, 224
metabolism in case of galactosuria, 1438
metabolism, periodicity in, 175
metabolism; rôle of thyroid gland, *1015
use in diet and treatment of infants, 406
Carbon Monoxide poisoning, partial cortical blindness with preservation of color vision; report of case following asphyxia (carbon monoxide poisoning); consideration of question of color vision and its cortical localization, 203
symptomatic chorea minor after poisoning by, 905

mottled enamel, distribution in United States, 216
of school children previously examined for rickets, *713
of Zurich children from 4 to 6 years of age, 921
streptococcemia, report of case of dental origin, 1109
temporary deciduous teeth, 1150
what pediatrician can do for dental cripples, 678
Temporal Bone, roentgenography and its clinical significance in aural disease, 446
Testicle, undescended, 1146
Tetanus, acute generalized, cured by intensive serotherapy, 653
avertin and specific management of tetanus, 1386
of umbilical origin in Algeria, 884, 1108
treatment, 467
Tetany calcipexicus of new-born infant, 646
calcium and phosphorus metabolism in infantile tetany, 1436
cerebral injury in new-born, its relation to constitution and tetany syndrome, *517
disturbances of blood phosphorus in rickets; rickets and tetany in fistulas of gallbladder, 173
in infants, 901
in new-born, 644
tetanigenic substances in thymus and urine, 905
Thomsen's Disease: See Myotonia congenita
Thorax, contour of chest according to age, *502
Thorium oleate, experiments on growth and longevity of white mouse; influence of injections of thorium oleate in oleic acid, and of oleic acid alone, on growth and longevity, 1371
Throat, scarlatiniform rash with hemolytic staphylococcic infection, 1151
Thrombophlebitis in acute rheumatism, 1382
Thrombosis, chronic thrombosis of splenic vein, 1449
vascular occlusion in pneumonia, review of literature and report of case, *830
Thumb: See Fingers
Thymoma, malignant, 1402
Thymus and thymic symptoms, 229
Death: See under Lymphatism
effect of thymus preparation on experimental hyperparathyroidism, 635
enlarged, and atelectasis in new-born, 879
hypertrophy, 1130
status thymico-lymphaticus with orthostatic albuminuria, 1125
tetanigenic substances in thymus and urine, 905
Thyroid enlargement in school children of Silesia, 1406
experimental study of thyroid function during pregnancy, parturition and puerperium, 1425
extract, effect on tissue respiration, 403
extract, experiments on growth and longevity of white mouse; influence of continuous administration of vegetable nucleic acid and intermittent administration of thyroid on growth and longevity, 1371
extract, influence on anterior pituitary on autotransplanted and homeotransplanted thyroid, 868
hyperplasia and iodine; iodine content of human skimmed milk from goitrous and nongoitrous regions, *1209
hyperthyroidism; effect of experimentally induced hyperthyroidism on vitamin B requirement of pigeons; physiology of vitamins, 1372
in mental deficiency, histological study, 1415
lymphatic system in genesis of rickets; morphology of thyroid in experimental rickets in rats, 173
rôle in carbohydrate metabolism, *1015
Thyrotropic substance, influence of extract of anterior lobe of pituitary gland and thyrotropic substance on gaseous metabolism, 875
Tibia, anterior tibial apophysitis, 193
tuberosity; anterior tibial epiphysitis or Lannelongue-Schlatter-Osgood's disease, 917
tuberosity; case of Schlatter-Osgood's disease, 917
tuberosity; epiphysitides during period of growth, 917
Tidwell, H. C.: Fat metabolism of premature infants, 1433
Intravenous administration of fat for therapeutic and diagnostic purposes, 926
Tissue, lipoids and lipoid diseases; lipoid content of tissues in status epilepticus, toxic encephalopathy and chronic leptomeningitis, 689
respiration, effect of thyroid feeding on, 403

Tobias, N.: Juvenile pemphigus; treatment with Germanin (Bayer 205); report of fatal case, *1084
Toes, familial clubbing of fingers and toes, report of case, 1101
Tongue, accessory, 877
glossiptosis due to atresia and hypotrophy of mandible, *541
macroglossia, case for diagnosis, 177
Tonsillectomy; adenotonsillectomy and disease of upper respiratory tract (common cold) in adults, 204
effect on development of immunity to scarlet fever, 1104
end-results of tonsil and adenoid operation in childhood and adolescence, 205
or electrocoagulation of tonsils (?), 673
or tonsillotomy, 675
pulmonary complications after, 1145
surgical treatment of tonsils, 445
tonsillar function and surgical therapy of palatine tonsils, 910
Tonsillitis, chronic, recognition of, 911
chronic, roentgen treatment, 912
identity of course of posttonsillitic sepsis and puerperal sepsis, 1145
with nephritis and peritonsillar abscess despite tonsillectomy, 446
Tonsillotomy, question of, 675
Tonsils, electrocoagulation or tonsillectomy of tonsils (?), 673
function and surgical therapy of palatine tonsils, 910
hemorrhages following tonsillar disease, 206
histologic picture of rheumatic fever; findings in tonsils removed by operation, 1134
problem, 910
tuberculosis, frequency and significance, 427
Toomey, J. A.: Enterodepressant factor in stools and spinal cords of monkeys infected with poliomyelitis, *30
Experimental production of poliomyelitis in Macacus rhesus monkeys, 687
Neutralizing value of various substances against lethal doses of (a) stool emulsions from patients with poliomyelitis and (b) colon paratyphoid organisms, *1284
Reflex changes in typhoid, *1296
Torticollis, congenital; review of pathological aspects, 449
nasopharyngeal, 908
Toxemia, alimentary; acid-base equilibrium with use of continuous intravenous therapy, 405
alimentary; effect of continuous venoclysis in intestinal intoxication, 218
alimentary; experimental investigation on treatment, 869
alimentary intoxication; pathology of, 172, 173, 410
alimentary; pH and alkaline reserve in chronic nutritional disturbances and toxicosis, 638
Tracheotomy, tracheobronchial croup, probably streptococcic; cure by tracheotomy and bronchoscopy, 909
Trask, J. O., Bacteriologic study of pneumonia over 6 year period, 924
